

Duluth City Council: February 10, 2020

The Pastoret Terrace Building is closer to demolition. The resolution passed. However, Councilors Sipress and Filipovich expressed their disappointment due to the need for affordable housing and the loss of an historic building.

A resolution was introduced by Councilors Medved and Forsman establishing the 2020 Duluth Business and Entrepreneurship Appreciation Award. Each councilor will have an opportunity to highlight a business that demonstrates positive results for their employees and the community. It should not be construed as an opportunity to promote a business. Resolution passed 6-2.

Three speakers expressed concerns about climate globalization. Climate crisis will affect every aspect of life in Duluth.

Two speakers stressed the need for affordable housing, especially since Essentia has had an impact with their buildings project.

Councilor Filipovich will meet with constituents before council meetings. Check his website and sign up.

Duluth City Council, September 9, 2019

Nine citizens addressed the City Council and voiced their concerns related to affordable housing in Duluth. Of great concern is the fact that Essentia has purchased housing near the hospital to accommodate their expansion plans. This makes the issue of affordable housing in Duluth an even greater worry. 2,000 in Duluth are homeless and housing is a basic human need. The Council was encouraged to use their leverage to ensure that Essentia has a plan to address their concerns.

Duluth City Council, April 8, 2019

It was Water Week and seventeen citizens, which included a group of UMD students, addressed the City Council with their concerns for the security of Lake Superior. A speaker from Soudan, MN stated that there is a 140-mile dead zone for wild rice in the St. Louis River. It has disappeared due to water coming off from mining operations. Former Governor Arne Carlson's report reminded us that, "Water is a victim of mining," "The process is flawed," "We must have evidentiary hearings," "Watershed cannot be replaced," and "It is time to wake up and take action." The recent dam failure in Brazil was cited as an example of consequences from copper nickel mining. The Council was urged to speak up. Water is life!!

The City Council addressed the need for scooter and bike regulations within the city. The resolution was tabled for Council members to study the resolution, get feedback from the community, and become informed as to regulations other communities have implemented.

Duluth City Council Meeting, March 11, 2019

Prior to the Council meeting a citizens group presented its findings related to issues facing the Duluth city golf courses. Financial difficulties of renewing assets and needs for capital improvement were discussed. It was deemed important that Duluth have an available golf course. The entire lengthy report can be accessed on the Duluth Parks and Recreation website; Findings of the Duluth Golf Citizen Advisory Committee.

City Administrator Schuchman comments: City of Duluth is exploring opportunities for more daycare centers which are needed; challenging snow season is ending and possible snow emergency rules for next season will be evaluated; Mayor Larson is in St. Paul advocating for the sales tax, which is badly needed for street improvements.

Eight citizens expressed their concerns about the future of the Duluth public golf courses. "Why was the advisory committee contracted by the city?", "Cannot sell the Lester Park Golf Course. It is park land.", "Why is debt held against courses when not against other Duluth amenities?", "Marketing and raising prices would help save the courses.", "A Master Plan is needed." Friends of Duluth Golf is a group of 400 concerned golfers that want to present positive alternatives to maintain the courses, without selling to a developer. The Parks and Recreation Meeting on March 13 will listen to public comment and provide input in order for the City Council to make a wise decision.

Dr. David Sproat from the Duluth Library Board thanked the Council for supporting the library. However, it is difficult to fulfill the mission of the library when there has been no increase in funding for the past years. Technology is backwards in time, which requires librarians to spend time on these tasks, rather than helping patrons. A staff position for early childhood literacy is needed. The physical plant is in dire straits. A resolution was passed to accept the \$90,000 gift from Friends of the Library. We would encourage all LWV members to join the Friends of the Library!

Duluth City Council, February 12, 2019

The Duluth Fire Department was denied a request to add another command position. Chief Dennis Edward's request to add a third deputy chief was supported by city administration and Local 101 Firefighters. "We need to expand the command staff to adjust to the changing needs of the fire department." This request required a unanimous approval by the Council. Eight councilors approved the request. Jay Fosle opposed.

Arik Forsman will seek reelection to the At Large Duluth City Council seat he now holds. He had been appointed to serve out Elissa Hansen's term.

Duluth City Council, January 14, 2019

Finance resolutions were read and approved. Two speakers questioned the affordable housing project, Lake View Apartments. "Why no mention of the grocery store?" Council overturned a 4-3 vote by the Planning Commission to approve the Park Point Marina Inn's plan to put up a three-story addition on the southeast side. Speakers voiced concern as to the view on the north side of Park Point. It was stated by Keith Hamre, that the 200-foot limit is not included in the "topography." Councilor Forsman explained that the 200-foot width already exceeds the limit. The resolution failed. The current rule needs to be revisited and more clarification is needed. A large contingency of T21 were present and voiced their approval to amend Chapter 11 of the city code, which prohibits the distribution of tobacco or tobacco related devices to anyone under the age of 21 years. This was a first reading. "Tobacco use has increased in MN in the past 17 years." "Vaping in high school bathrooms poses a concern." "Tobacco is the leading cause of preventive deaths." A 120-day implementation period was added to the resolution. It could go to a vote on Jan. 28.
